

Advantages of Other 3M™ Window Films Products

Reduced glare.

Few things are as frustrating as working on a computer screen or trying to watch television in a sunlit room.

By significantly reducing glare, our films help you do your work or relax without the added eyestrain from excessive light.

Increased comfort and energy savings.

On a warm day, the sun shining through your windows can drastically increase the warmth of a room. Not only do you become more uncomfortable, all that heat is costing you money when your air conditioner tries to keep up. By rejecting up to 79% of the sun's heat, our film can significantly reduce your energy bill. The Skin Cancer Foundation recommends many 3M Window Film products as effective UV protectants.

3M Window Films address the three major causes of fading.

3M Window Films are designed to reduce the effects of solar heat and visible light on your furnishings and will block up to 99% of the sun's harmful ultraviolet rays, which are the single largest cause of fading. Depending on the film you chose, you can enjoy a 79% reduction in the sun's heat. While no film can stop fading completely, our films dramatically slow the progress of fading to keep your home looking beautiful.

Increased Personal and Property Protection.

3M™ Safety & Security Window Films are designed to keep broken glass together, offering increased protection against a variety of events such as bomb blasts, severe weather, earthquakes, and breaking and entering crimes.

3M™ Anti-Graffiti Window Film shields graphics, surfaces and windows from vandalism and damage.

Why waste time and money replacing windows? 3M™ Anti-Graffiti Window Film helps prevent the damage in the first place by winning the fight against graffiti before it begins.

3M™ Anti-Graffiti Window Film is an optically clear, distortion-free film for protection of windows, graphics, mirrors, and other surfaces in retail, public facilities and any street-level glass applications. Useful for interior or exterior applications, the film comes in two thicknesses for graffiti abatement in low-risk or high-risk situations and is particularly effective in resisting damage from glass-etching solutions used by vandals. When applied to glass, this film also offers the extra benefits of blocking 99 percent of damaging ultraviolet rays.

Image is everything. Protect it.

Gouge Resistant

Helps repel intentional attempts to gouge, deface or destroy graphics and surfaces.

Acid-etch Resistant

Helps protect glass from permanent damage caused by glass etching solutions.

Scratch Resistant

Helps resist scratching and abrasion caused by sharp objects or devices.

Clean Removability

Adheres clearly and firmly to glass, but can be easily removed leaving little or no residue when replacement is needed.

Indoor/Outdoor Use

May be applied to either interior or exterior locations.

Easy To Use

Easy to apply and clean with conventional glass cleaning solutions.
